BAB I

PENDAHULUAN

1.1 Latar Belakang

Dalam era digital saat ini, memiliki website portfolio menjadi kebutuhan yang sangat penting, terutama bagi individu yang ingin menampilkan karya dan keahlian mereka secara profesional. Website portfolio memungkinkan seseorang untuk menunjukkan pengalaman, proyek, serta keterampilan dalam format yang lebih interaktif dan mudah diakses oleh calon klien atau pemberi kerja. Penggunaan teknologi web seperti PHP, HTML, CSS, dan JavaScript menjadi dasar dalam pengembangan website portfolio yang dinamis dan responsif.

Website portfolio juga berperan sebagai sarana branding personal yang dapat meningkatkan kredibilitas seseorang di dunia profesional. Dengan website yang menarik dan informatif, seseorang dapat lebih mudah menarik perhatian perekut, klien, maupun mitra bisnis potensial. Oleh karena itu, penting untuk memahami bagaimana membangun website portfolio yang efektif dan sesuai dengan kebutuhan pengguna.

1.2 Rumusan Masalah

- a. Bagaimana cara membangun website portfolio yang menarik, fungsional, dan responsif?
- b. Teknologi apa saja yang digunakan dalam pengembangan website portfolio?
- c. Bagaimana penerapan PHP dalam pembuatan website portfolio untuk mengelola data secara dinamis?
- d. Bagaimana cara mengoptimalkan keamanan dan performa website portfolio?

1.3 Tujuan

- a. Mengembangkan website portfolio yang interaktif, user-friendly, dan responsif.
- b. Menjelaskan penggunaan PHP dalam membangun fitur-fitur dinamis pada website.
- c. Mengoptimalkan tampilan dan fungsi website agar sesuai dengan kebutuhan pengguna.

BAB II

TINJAUAN PUSTAKA

2.1. Konsep Website Portfolio

Website portfolio adalah situs web yang digunakan oleh individu atau profesional untuk menampilkan hasil kerja, pengalaman, dan keterampilan mereka. Menurut Welling & Thomson (2019), PHP adalah bahasa pemrograman sisi server yang sangat fleksibel dan sering digunakan dalam pengembangan web dinamis. Selain PHP, teknologi lain seperti HTML, CSS, dan JavaScript juga berperan penting dalam membangun tampilan dan interaktivitas website.

Website portfolio dapat dikategorikan menjadi beberapa jenis, yaitu:

- **Portfolio Desain Grafis:** Menampilkan karya visual seperti ilustrasi, desain UI/UX, dan animasi.
- **Portfolio Pengembang Web:** Berisi proyek pemrograman dan aplikasi berbasis web.
- **Portfolio Profesional:** Digunakan oleh individu dalam berbagai bidang seperti fotografi, arsitektur, dan pemasaran digital.

2.2. Teknologi yang Digunakan dalam Website Portfolio

Menurut McFarland (2022), desain responsif adalah elemen penting dalam pengembangan website modern. Dengan menggunakan framework CSS seperti Bootstrap atau Tailwind CSS, website dapat menyesuaikan tampilannya secara otomatis dengan berbagai ukuran layar, meningkatkan pengalaman pengguna secara signifikan.

2.3. User Experience (UX) dan User Interface (UI) dalam Website Portfolio

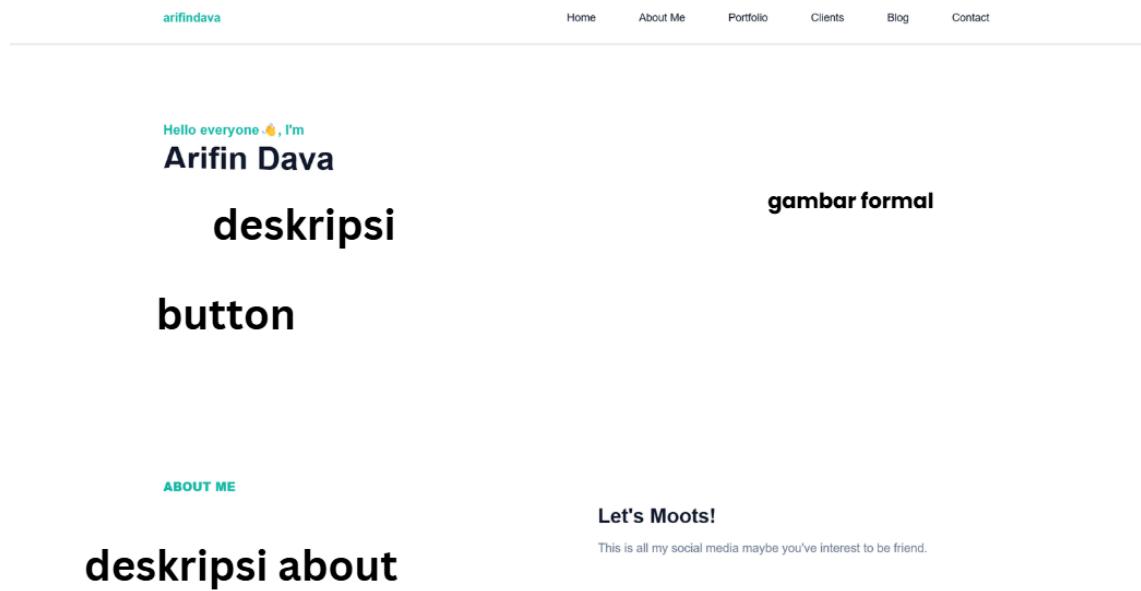

Menurut Nielsen (2021), user experience (UX) dalam website sangat berpengaruh terhadap efektivitas penyampaian informasi dan daya tarik pengguna. Prinsip desain UX yang baik mencakup:

- Navigasi yang mudah dan intuitif.
- Tata letak yang bersih dan minimalis.
- Kecepatan akses yang optimal.

Sementara itu, Bruce (2021) menekankan pentingnya desain UI yang menarik, seperti pemilihan warna, tipografi, dan ikon yang sesuai dengan branding personal.

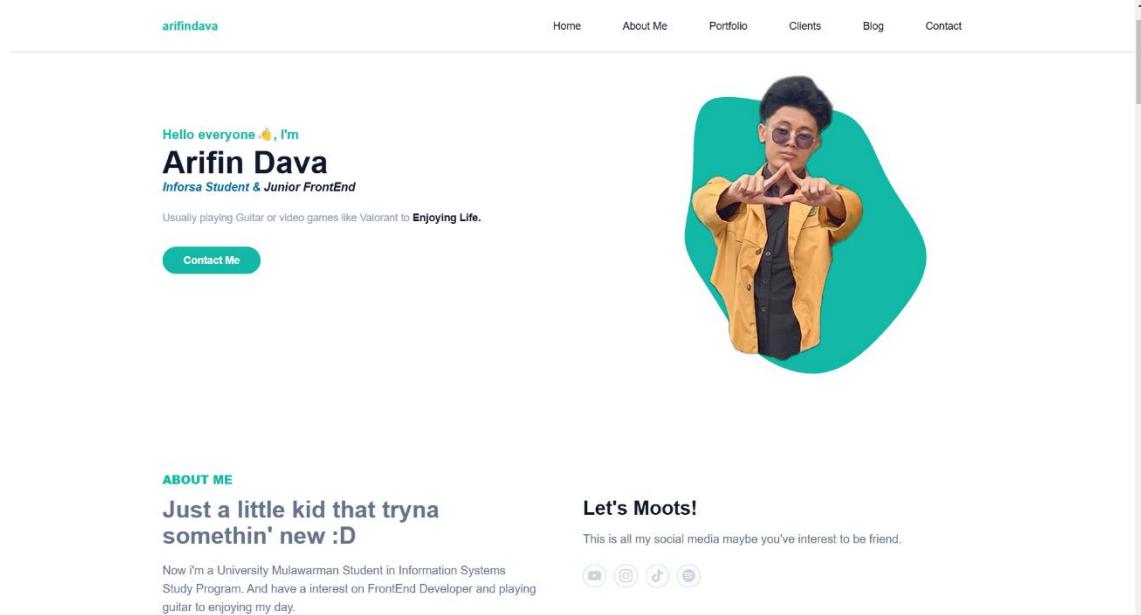

2.4. Mock Up website / Rancangan desain serta hasil website.

Mock Up Navbar dan Hero section.

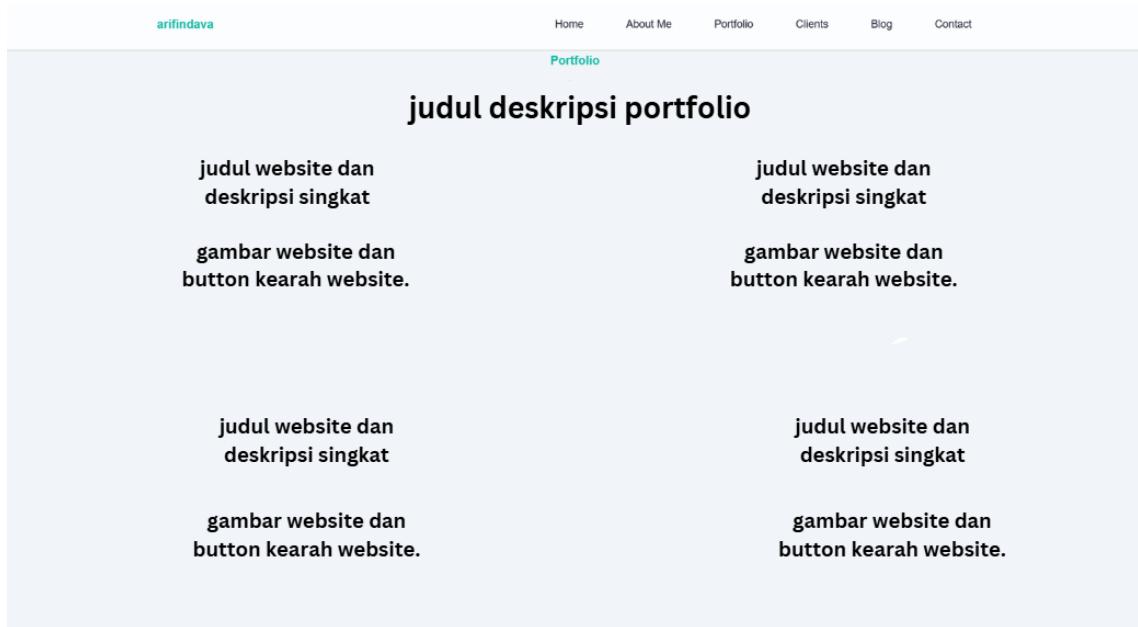

Gambar 2.1 Mockup section Navbar, Hero, dan About Me

Hasil Website

Gambar 2.2 Hasil section Navbar, Hero, dan About Me.

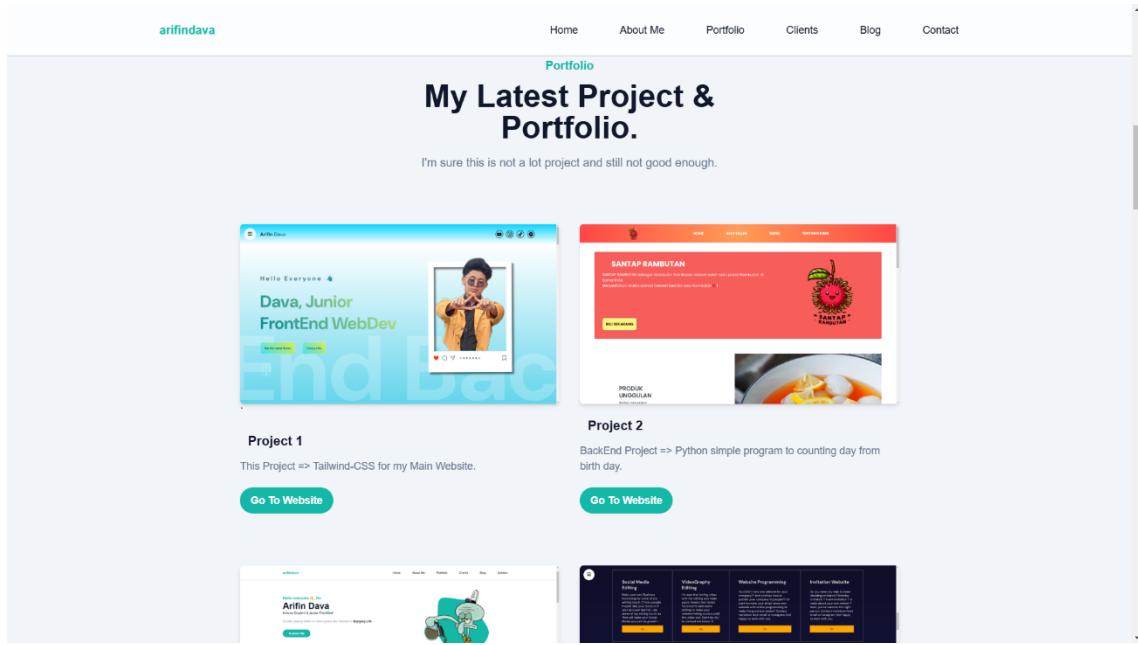

Mock Up section Portfolio

The image shows a wireframe or mock-up of a portfolio section. At the top, there is a navigation bar with links: Home, About Me, Portfolio, Clients, Blog, and Contact. Below the navigation bar, the word "Portfolio" is centered. Underneath "Portfolio", the title "judul deskripsi portfolio" is displayed. The main content area contains four pairs of placeholder text and images. Each pair consists of a left column and a right column. The left column contains the text "judul website dan deskripsi singkat" and "gambar website dan button kearah website.". The right column contains the text "judul website dan deskripsi singkat" and "gambar website dan button kearah website.". This layout is repeated twice more below the first pair.

Gambar 2.3 Mock Up section Portfolio.

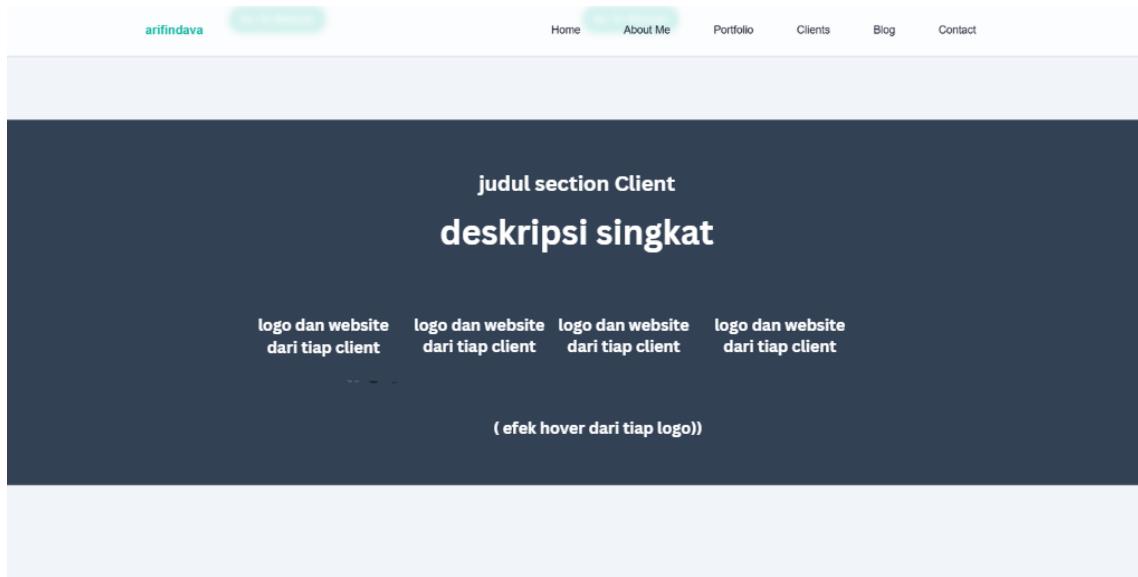

Hasil website.

The image shows the final result of the portfolio section. It features a navigation bar at the top with links: Home, About Me, Portfolio, Clients, Blog, and Contact. Below the navigation bar, the word "Portfolio" is centered. The main content area has a heading "My Latest Project & Portfolio." followed by a subtext "I'm sure this is not a lot project and still not good enough." Below the heading, there are two projects displayed side-by-side. Project 1 on the left is a Tailwind-CSS project for a main website, featuring a blue-themed landing page with a photo of a person. Project 2 on the right is a Python simple program to count days from birth day, featuring a red-themed landing page with a photo of a fruit. Below each project is a "Go To Website" button. At the bottom of the page, there are two smaller screenshots of the website's homepage.

Mock Up section Dashboard.

The mock-up dashboard features a header with the logo 'arifindava' and navigation links for Home, About Me, Portfolio, Clients, Blog, and Contact. Below the header, a title 'judul dan deskripsi singkat message' is displayed. Six identical message cards are listed, each containing placeholder text: 'message yang berisi nama, email, date, dan isi message'.

Hasil website.

The final website screenshot shows the 'User Messages' section under the 'Dashboard' heading. It displays five user messages in a list:

- John Doe**
johndoe@example.com
Date: 2025-03-05
Message: I absolutely love using this site! The interface is so user-friendly, and I always find what I need quickly. Keep up the great work!
- Alice Smith**
alicesmith@email.com
Date: 2025-03-05
Message: This website is fantastic! It's easy to navigate and the information is really helpful. Definitely one of my go-to sites now!
- Michael Johnson**
mikejohnson@domain.com
Date: 2025-03-05
Message: I'm really impressed by the functionality and the sleek design of this site. It just works perfectly for me, and I'm always recommending it to friends!
- Emily Brown**
emily.brown@example.net
Date: 2025-03-05
Message: I love how intuitive everything is. I always get the answers I need without hassle. This site makes everything so much easier!
- David Lee**

BAB III

PEMBAHASAN

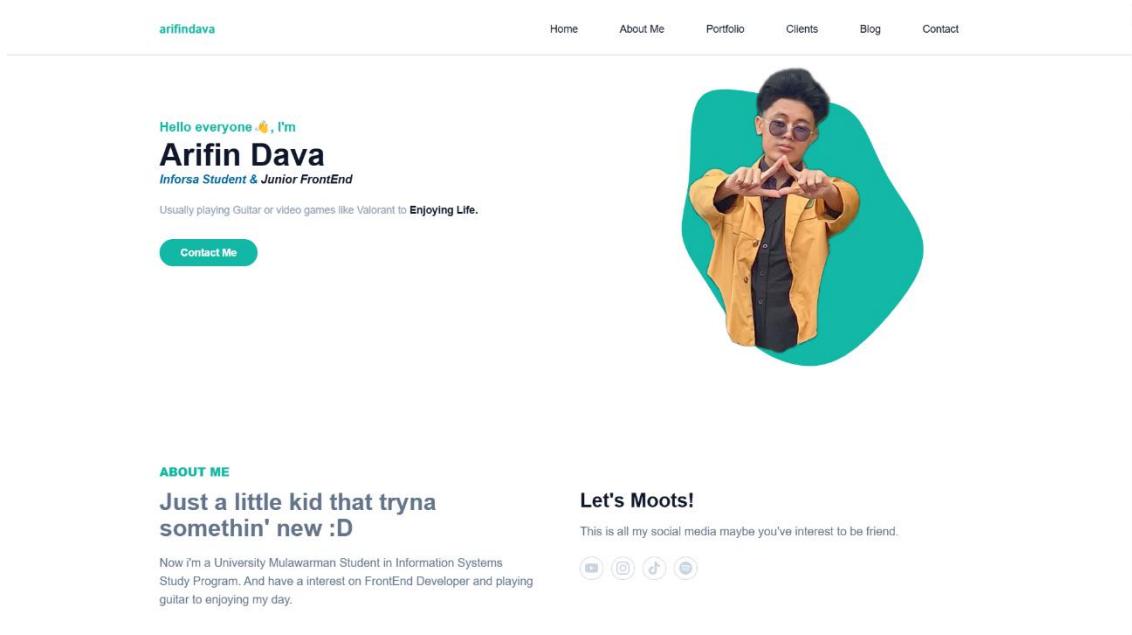

Dalam pembuatan website portfolio ini, PHP digunakan sebagai backend untuk mengelola data pengguna dan tampilan konten secara dinamis. Berikut adalah beberapa aspek utama dalam pengembangan website portfolio:

1. Struktur Website
 - a. Halaman utama: Berisi pengenalan dan navigasi ke halaman lainnya.
 - b. Halaman tentang (About): Menjelaskan latar belakang, keahlian, dan pengalaman pemilik website.
 - c. Halaman proyek (Portfolio): Menampilkan daftar proyek yang telah dikerjakan beserta deskripsi dan media pendukung.
 - d. Halaman kontak (Contact): Menyediakan formulir untuk menghubungi pemilik website dengan fitur validasi input.
 - e. Blog (opsional): Berisi artikel yang berkaitan dengan bidang keahlian pemilik website untuk meningkatkan SEO.
2. Penggunaan PHP dalam Website
 - a. Routing dan Struktur File: PHP digunakan untuk mengelola struktur halaman dengan pendekatan modular menggunakan konsep MVC (Model-View-Controller).
 - b. Database Management: Data proyek, informasi pengguna, dan pesan dari formulir kontak disimpan dalam database MySQL.
 - c. Form Handling: Formulir kontak menggunakan PHP untuk mengirim email atau menyimpan pesan ke database dengan validasi input.
 - d. Keamanan Website: Mengimplementasikan sanitasi input, hashing password, dan penggunaan prepared statements dalam SQL untuk menghindari SQL Injection.
3. Implementasi Teknologi Pendukung
 - a. HTML & CSS: Digunakan untuk membangun tampilan website yang menarik dan profesional.
 - b. JavaScript & jQuery: Digunakan untuk menambahkan fitur interaktif seperti efek transisi dan validasi formulir.

- c. Bootstrap & Tailwind CSS: Digunakan untuk memastikan desain yang responsif dan kompatibel dengan berbagai perangkat.
- d. SEO Optimization: Penggunaan meta tag, structured data, dan optimalisasi kecepatan loading untuk meningkatkan peringkat website di mesin pencari.
- e. Optimasi Performa dan Keamanan
- f. Caching: Menggunakan teknik caching untuk mempercepat akses halaman.
- g. Minifikasi CSS & JavaScript: Mengurangi ukuran file untuk meningkatkan kecepatan loading website.

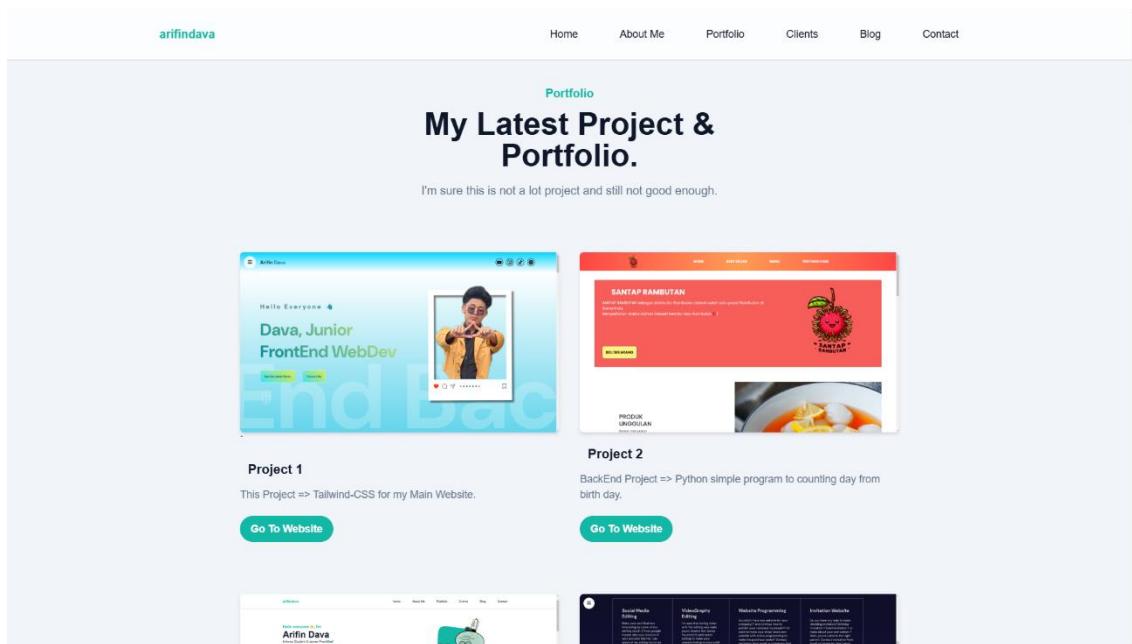

3.1 Tampilan Website

Tampilan Navbar, Hero dan About Me dari website porfolio

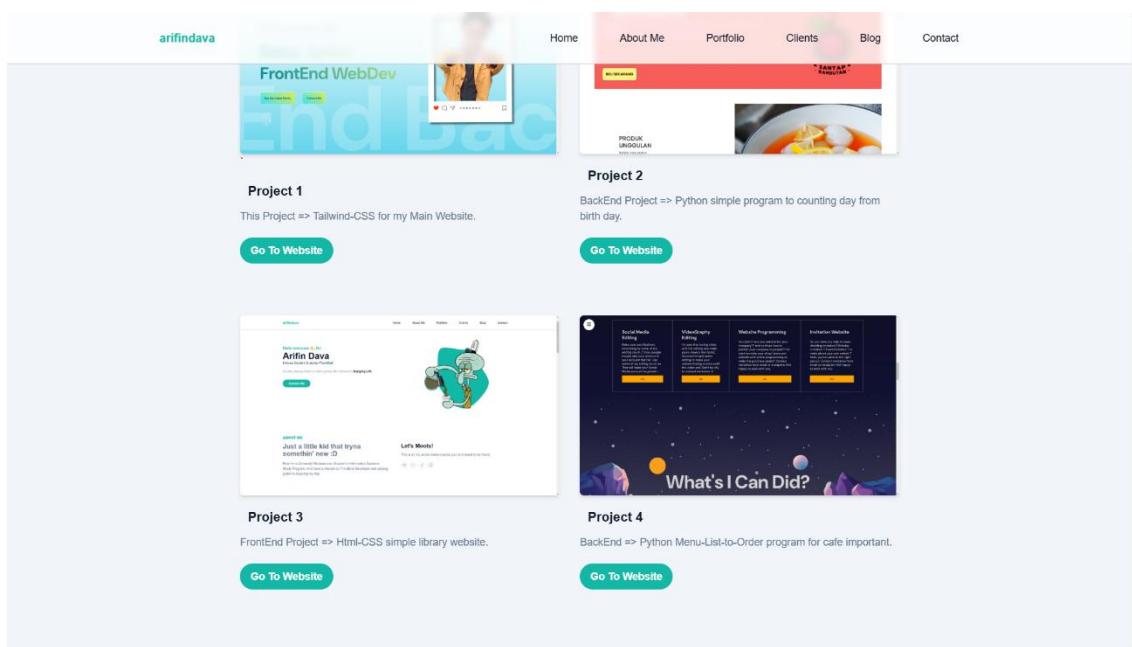

Gambar 3.1 Tampilan section Navbar, Hero, dan About Me

Tampilan Portfolio pada website yang berisi portfolio website lain yang saya miliki seperti website Portfolio lain yang menggunakan ReactJS, website UMKM Santap Rambutan.

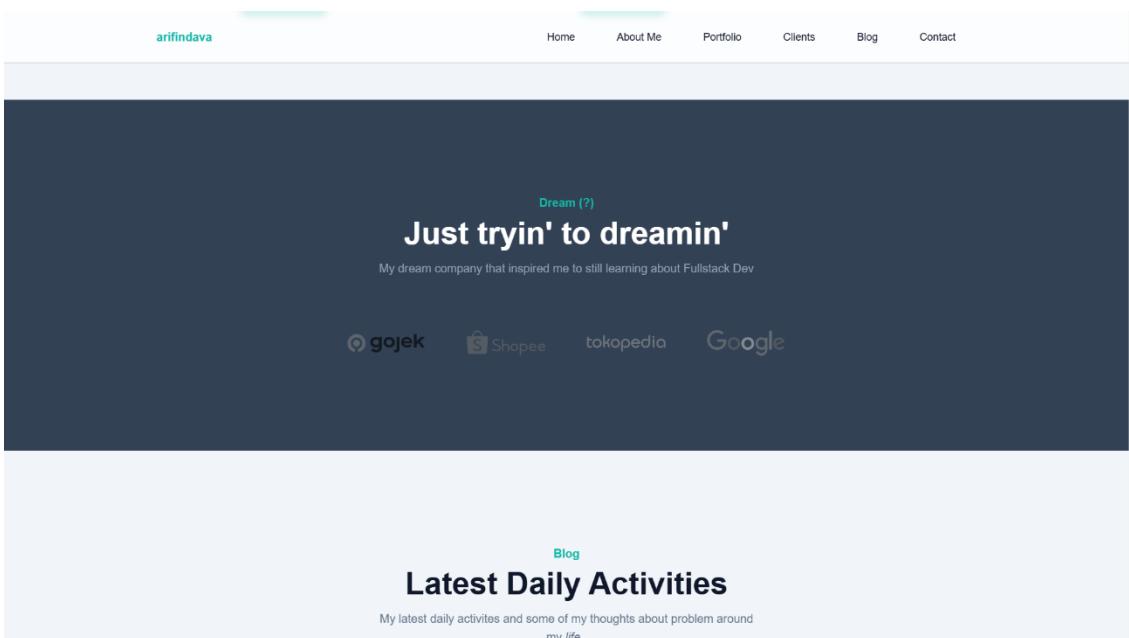

Gambar 3.2 Tampilan section Portfolio

Tampilan website Portfolio saat ini namun tanpa PHP, dan website Portfolio lain dalam mode Dark.

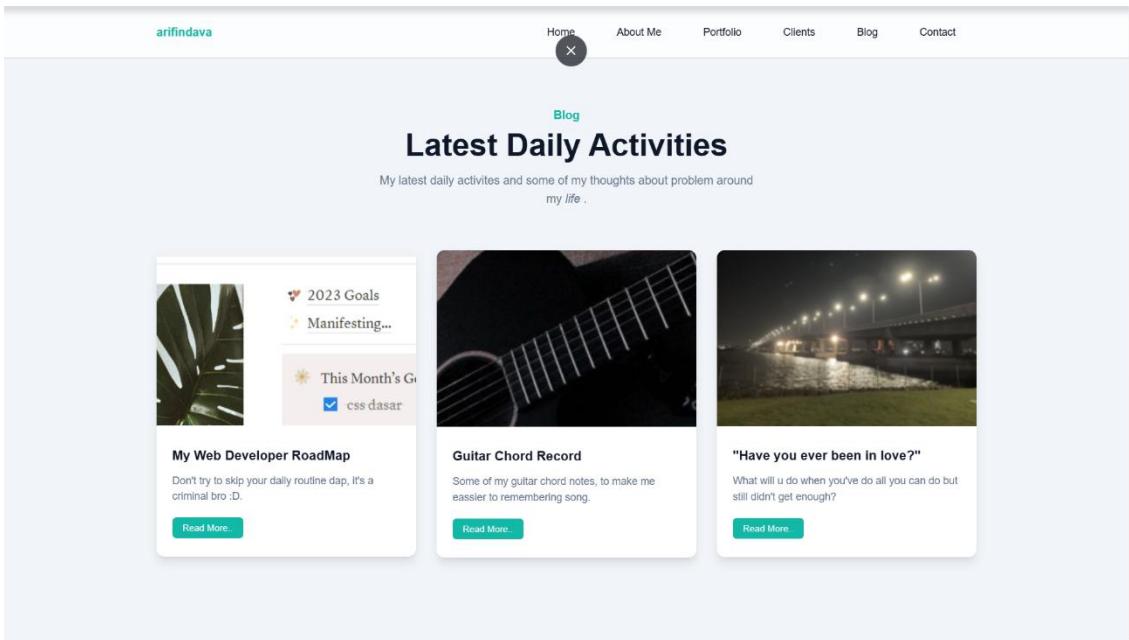

Gambar 3.3 Tampilan section Portfolio 2.

Tampilan website bagian Clients yang berisi client yang pernah saya lakukan kerjasama (hanya fiktif).

Gambar 3.4 Tampilan section Client.

Tampilan website Blog.

Gambar 3.5 Tampilan section Blog.

Tampilan website bagian Contact/Message yang dapat digunakan untuk meninggalkan pesan ataupun *feedback* terkait website, atau untuk melakukan permintaan atau pemesanan kepada saya sebagai pemilik website. User dapat mengisi nama, email, tanggal, dan isi pesan, dan diakhir juga dapat memilih apakah ingin menampilkan nama atau disembunyikan dan hanya akan

menampilkan “Anonymous” untuk menjaga privasi. Kemudian data tersebut akan tersimpan ke database contact_form yang kemudian akan ditampilkan kedalam section dashboard.

The screenshot shows a contact form titled "Leave Some Message Here". At the top, there is a message: "If you mind to send me some message or anything else about this website." Below this are four input fields: "Name", "Email", "Date" (a date picker), and "Message". There is also a checkbox for "Display Name as Anonymous". A large teal "Send" button is at the bottom.

Gambar 3.6 Tampilan section Contact/Message.

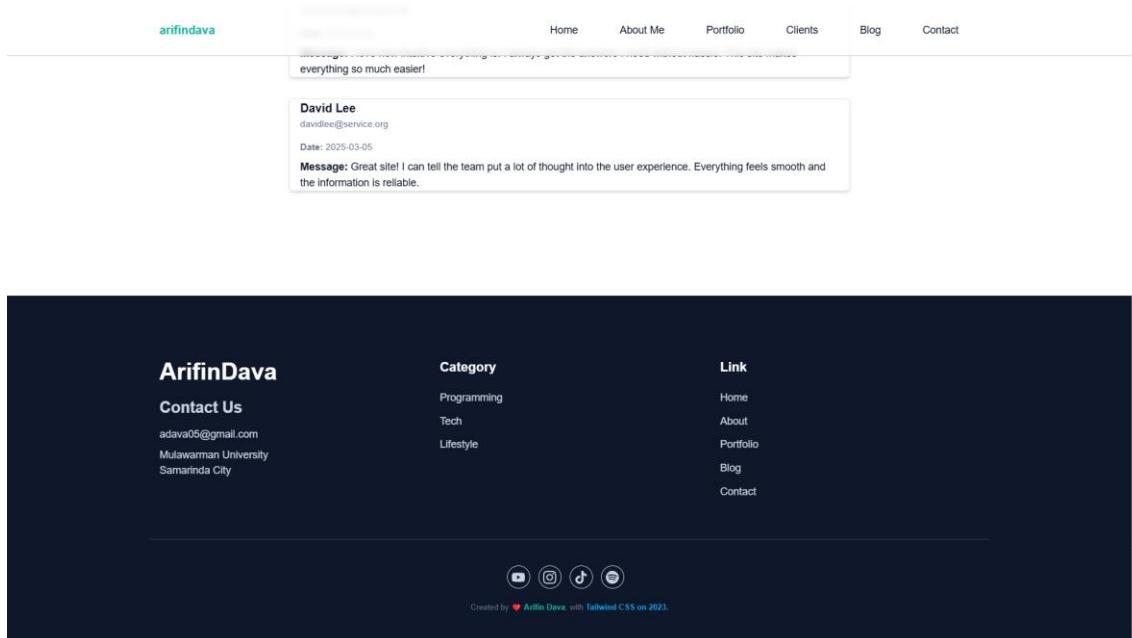

Tampilan dashboard website yang berisi pesan-pesan yang pernah diinput kedalam website yang diambil dari database dan kemudian ditampilkan dashboard, dashboard ini berguna untuk melihat feedback ataupun pesan terkait website dan saya sebagai pembuat website.

The screenshot shows a section titled "User Messages" under "Dashboard". It displays five messages from different users: John Doe, Alice Smith, Michael Johnson, Emily Brown, and David Lee. Each message includes the user's name, email, date, and a brief message. The messages are presented in a list format with rounded corners.

User	Email	Date	Message
John Doe	johndoe@example.com	2025-03-05	I absolutely love using this site! The interface is so user-friendly, and I always find what I need quickly. Keep up the great work!
Alice Smith	alicesmith@email.com	2025-03-05	This website is fantastic! It's easy to navigate and the information is really helpful. Definitely one of my go-to sites now!
Michael Johnson	mikejohnson@domain.com	2025-03-05	I'm really impressed by the functionality and the sleek design of this site. It just works perfectly for me, and I'm always recommending it to friends!
Emily Brown	emily.brown@example.net	2025-03-05	I love how intuitive everything is. I always get the answers I need without hassle. This site makes everything so much easier!
David Lee			

Gambar 3.7 Tampilan section Dashboard.

Tampilan Footer yang berisi data contact saya yaitu email dan asal saya, kemudian Category dan juga Link untuk menuju section-section website dan juga sebagai section akhir suatu website yang menampilkan hak cipta website dan tahun dibuatnya.

Gambar 3.8 Tampilan section Footer.

BAB V

PENUTUP

KESIMPULAN

Pembuatan website portfolio menggunakan PHP memberikan kemudahan dalam pengelolaan konten dan tampilan yang dinamis. Dengan menggabungkan teknologi pendukung seperti HTML, CSS, JavaScript, dan database MySQL, website portfolio dapat menjadi platform yang efektif dalam menunjukkan karya dan keahlian seseorang secara profesional. Selain itu, pengoptimalan performa dan keamanan sangat penting agar website dapat berjalan dengan baik dan tetap terlindungi dari ancaman siber.

Dengan desain yang user-friendly, fitur yang lengkap, dan keamanan yang terjamin, website portfolio diharapkan dapat meningkatkan daya saing individu di dunia digital serta memudahkan akses bagi calon klien atau mitra bisnis.
